## ANNUAL ANNOUNCEMENT.

---

The Medical Faculty of the University of Louisville take great pleasure in presenting the foregoing Catalogue to the *alumni* and friends of the Institution. It will be seen that the number of its graduates is one thousand and forty-one, and if to this be added those who have received from the school the *Honorary* and *Ad Eundem* degrees, the total will be one thousand and ninety-three. These numbers exhibit a steadiness of growth and a stability of reputation most gratifying to all who feel an interest in its prosperity. Imposing as they are; however, they do not afford exactly a fair indication of the rate of increase in the number of its students; for while in most American medical colleges the proportion of matriculants to the graduates is only two to one, and in some even less, in this institution the average has been about four to one. The whole number of Students, in the school, has been *four thousand two hundred and thirty-two*. Much of the remarkable share of public favor which it has enjoyed is justly attributable to its eligible location and its ample endowment by the citizens of Louisville, but much is also due, the Faculty must believe, to its satisfactory organization, and to their unremitting efforts to introduce into the system of instruction in the school all the valuable improvements of the day. Its organization, they feel assured, was never more acceptable to the profession than it is at the present time, and its prospects for continued success were never more encouraging.

Additions will be made, during the summer, to the library, chemical apparatus, and anatomical museum

The next regular course of lectures, the seventeenth in the school, will commence on Monday, the 31st day of October, and continue until the last of February, with a recess at Thanksgiving and Christmas of one day each.

During the month of October the Anatomical Rooms will be open, under the direction of the Demonstrator of Anatomy, and in that month, commencing on the first Monday, a preliminary course of lectures will be given, in which all the professors will participate. The course will consist, in part, of clinical lectures at the Louisville Marine Hospital, by Prof. Flint, and of surgical operations, the examination of cases, prescriptions, and lectures by Prof. Gross, at the University Clinic. Prof. Palmer will lecture on Microscopical Anatomy; and the subjects of the courses by Professors Miller, Yandell, Rogers, and Silliman will embrace the Medical Jurisprudence of Obstetrics, the Comparative Anatomy of the Nervous System, and Vegetable and Mineral Poisons.

The examination of candidates for graduation will commence on the first of March, and as soon as practicable after the examinations are over the annual Commencement will be held. Candidates are required to give in their names to the Dean, accompanied by their Theses and their Graduation-fees, on or before the first of February. The degree will not be conferred upon any candidate who shall absent himself from the Commencement, except by special permission of the Faculty.

Students are recommended to avail themselves of the advantages of the October course of lectures, and they are expected to remain to the end of the winter term.

## FEES.

The fee for admission to each course of lectures is *fifteen dollars*, (in the aggregate \$105) payable, as are all the fees, in advance.

The Matriculation ticket gives the student the use of the extensive library of the institution during the winter, and costs five dollars.

The graduation fee is twenty-five dollars. The fee for admission to the Dissecting Rooms and for instruction by the Demonstrator of Anatomy, is ten dollars.

The fee for clinical instruction at the Louisville Marine Hospital is five dollars.

## TEXT-BOOKS.

The following works will be found by students useful accompaniments to the different courses of lectures:

*On Anatomy*—Wilson, Sharpey and Quain. *On Physiology and Pathological Anatomy*—Carpenter, Kirkes and Paget, Gross. *On Surgery*—Cross's Liston, Gross on the Urinary Organs. *On Obstetrics and the Diseases of Women and Children*—Miller, Chailly, Ashwell, Condie. *On Materia Medica and Therapeutics*—Pereira, Wood and Bache's Dispensatory. *On Chemistry*—Silliman. *On Theory and Practice*—Wood, Bell and Stokes, Watson.

 Good boarding, in genteel private families—fire and lights included—can be procured at from \$2 50 to \$3 a week.

Gentlemen desiring fuller information will address the Dean of the Faculty.
